

November was the third busiest month of the year with 28 attacks uncovered. Our research shows that organizations in the services industry were hit the hardest, followed by the government sector. Education took a back seat this month with only one recorded incident. Here is a roundup of what we uncovered for the month.

Ransomware Exfiltration Techniques

Average ransom demand by strain²²Courtesy [Coalition](#)

This report was generated in part from data collected by [BlackFog Enterprise](#) over the specified report period. It highlights significant events that prevented or reduced the risk of ransomware or a data breach and provides insights into global trends for benchmarking purposes. This report contains anonymized information about data movement across hundreds of organizations and should be used to assess risk associated with cyber crime.
